

## Division of Sports

### 1. General Overview

The kind of sport the Department is concerned with is not elite sport but sport for ordinary people, sport for all. We are concerned with the well-being of the general public and their ordinary sport activities. The Department aims to produce professional sport leaders, coaches and trainers for ordinary people. We teach Human Anatomy, Measurement and Evaluation of Physical Education, Sport Psychology, and Sport Marketing, among others, to understand human body and mind, together with training methods for various sports.

### 2. Educational Goals/Objectives

We place emphasis on understanding of human body as well as specific training methods. For this purpose we provide comprehensive curricula, including Leadership in Sport for All, Human Anatomy, Measurement and Evaluation in Physical Education, Sport Psychology, Sport Marketing, and Leisure and Recreation. The departmental objectives can be summarized as follows:

- diversity and professionalism in education
- practical leadership
- flexible curricula for the social change
- professional sport businessmen
